

I think the NAB's petition 04-160 is another plea for the boadcasters association to hold on to a industry that is quickly becoming less powerful and I think the petition should be voted down and denied at all costs. I pay a monthly fee for my XM service and therefore I should be able to recieve the traffic and weathe updates when and where I want to. Why should I have to use another source to get traffic and weather infromation outside of the services I pay for. The NAB needs to accept that their broadcasting is dominated by advertising and that they are nothing more than an outlet for advertisers as opposed to actual music or news. Cable television stations like HBO, Cinemax and other are a paid service without commercials or regulations and that is the same things XM is, so please vote against the NAB Petition 04-160.
